

Meet an Alien

Name _____

Date _____

Have you ever met an alien? Would you know if you had met one? Aliens are beings or creatures that live anywhere except on Earth. Scientists know that other planets and galaxies exist, so some people believe that other life forms must also exist. Aliens are those other beings. Sometimes, aliens are called ETs which stands for extra-terrestrials. Since aliens must also be able to get around they need vehicles. A vehicle that is seen in the sky but cannot be identified is a UFO or unidentified flying object. These are thought to be vehicles or cars for aliens. Do you believe in aliens?
