The Human Body

Read the passage below. Match the bolded words with the meanings in the table below.

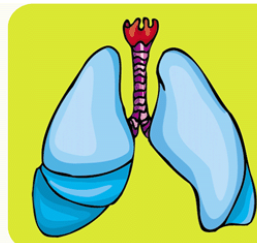

The human body has many parts. The **heart** is located in our chest. Its function is to pump blood to the rest of the body. It beats many times each minute of the day. We use our **lungs** to breathe and get oxygen to our body. The **brain** is located in our head, and it controls our body. The **stomach** is another organ, and it helps break down (digest) the food we eat.

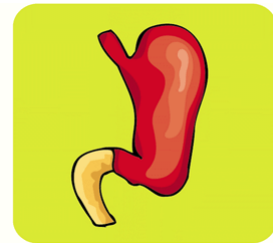

HEART

BRAIN

LUNGS

STOMACH

Glossary	
	Controls our body functions.
	The organ we use for breathing.
