Read the passage below on lions, and then answer the questions.

Lions are big cats. They have fur, whiskers and long tails. They live in the grasslands of Africa and India. They live in groups called "prides", which are like their families. Male lions have a mane of hair around their necks. Female lions do not have a mane. Lions hunt for their food. They hunt zebra, warthogs and antelope.

1. Where do lions live?

---

2. Do male or female lions have a mane of hair (around the neck)?

---

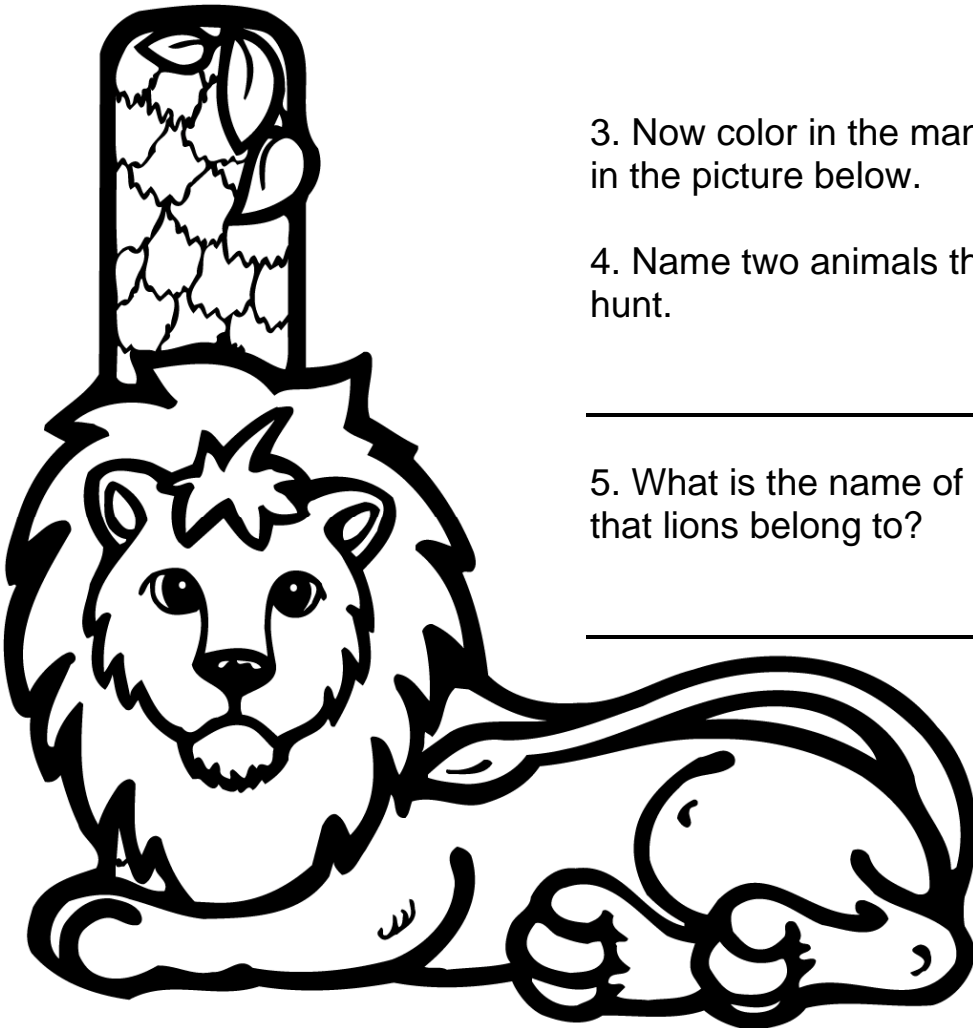

3. Now color in the mane of the lion in the picture below.

4. Name two animals that lions hunt.

---

5. What is the name of the group that lions belong to?

---

Read the passage below on lions, and then answer the questions.

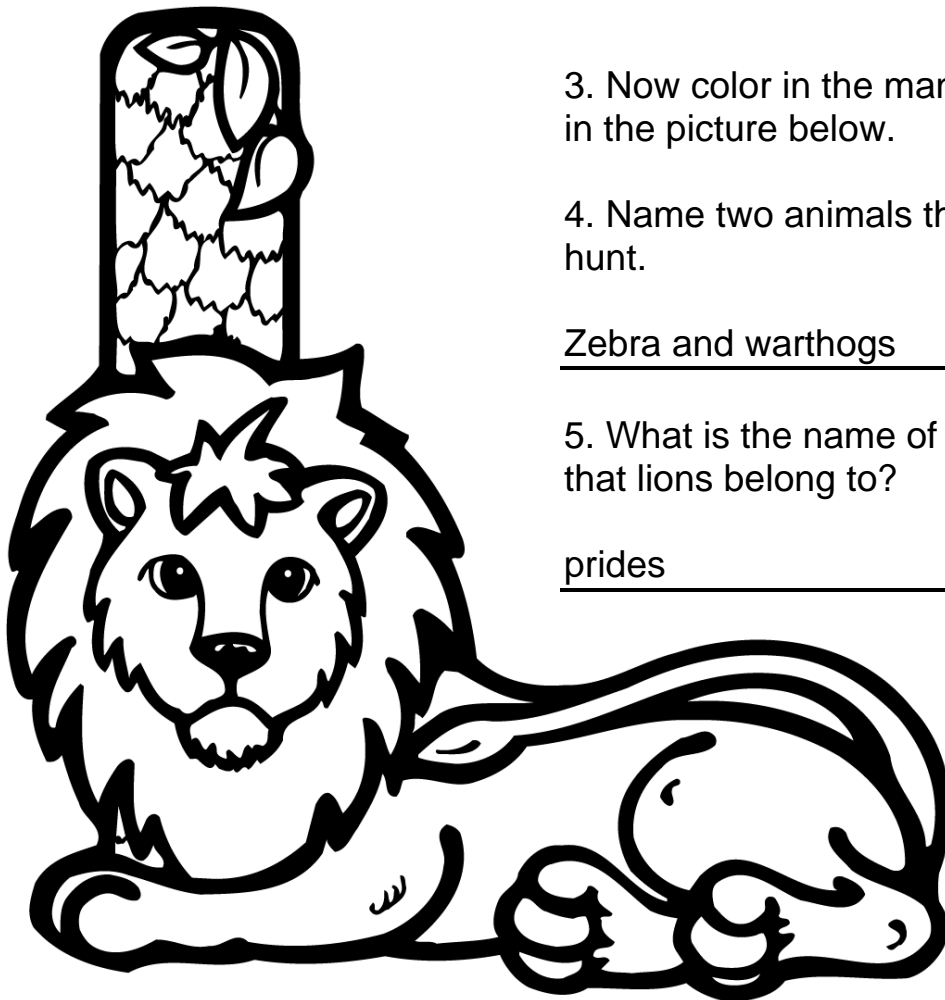

Lions are big cats. They have fur, whiskers and long tails. They live in the grasslands of Africa and India. They live in groups called “prides”, which are like their families. Male lions have a mane of hair around their necks. Female lions do not have a mane. Lions hunt for their food. They hunt zebra, warthogs and antelope.

1. Where do lions live?

In the grasslands of Africa and India
