

Name: _____

The Solar System

The solar system is the sun and all the planets that circle around it. There are eight planets in our solar system, and the sun is at the center.

Many years ago, people thought that the earth was in the center. They thought that the sun and other planets went around the earth.

But, by watching the movement of the stars, and the sun, and the planets, scientists found out that the planets are in orbit around the sun.
