

Name _____ **Confirming Spelling**

The Tundra

DIRECTIONS: Read the passage. Answer the questions.

A biome is a large, naturally occurring community of plants and animals. Tundras are some of the harshest, coldest biomes on earth. Tundras are found in the artic, and at the tips of mountains. There are no trees in a Tundra. The climate is cold and windy, and there is very little rainfall. Tundras are often covered with snow for most of the year, but in summer these same lands are covered with colorful wildflowers.

1. What are the following examples of: grassland, savanna, tundra? _____

2. Of the examples given in #1 above, which has no trees? _____

3. What is cold and windy in a Tundra? _____

4. Write each underlined word on the first line. Break each of the underlined words into syllables. Write one syllable on each line. There may be more lines than there are syllables in each word.

5. _____

6. _____

7. _____
