How to Fold a Paper Airplane

Writers use transitions to organize details into logical order. One way to organize your thoughts is to present ideas or events in the order in which they occur. Transitions of sequence include dates, times and numbers. Processes are explained through steps or stages. Transitions words like first, second, next, then, now, and finally signal time or process.

**DIRECTIONS:** Below are the steps to making a paper airplane. Read the steps. Put them in the correct order by writing a number 1 to 7 on the line beside each step. Then rewrite the steps as a paragraph, using appropriate transition words.

---

___ Get a sheet of paper.

___ Fold it in half lengthwise.

___ Fold along the center line. This fold should hide all the other folds inside.

___ Fold the top corners in to the center.

___ Fold the angled edge into the center.

___ Fly your plane!

___ Fold down the wings.
