

Veggie Haters

DIRECTIONS: Read each paragraph. Write a concluding statement for each.

1. Squash is gross. Many people don't like squash. It doesn't have a pleasant taste. Some varieties of squash, like spaghetti squash, have a weird texture. Others, like sunburst squash, can sometimes be bitter.

2. Tomatoes are very weird. Inside they have cavities filled with a kind of jelly, in which seeds are suspended. Many of the tomatoes you get in the grocery store aren't even ripe, so biting them is like biting into a piece of foam. Plus, technically, tomatoes are a fruit, which is hard to believe, since they don't taste like a fruit.

3. People should eat hamburgers and hotdogs and leave kale to the rabbits. Kale doesn't have much taste. It is stalky and fibrous and hard to chew. Whenever my mother makes me eat kale, it gets stuck in my teeth, which is really embarrassing.
