

Name: _____

The Camping Mystery

Natalie and her family were out camping one night. When everyone was asleep in the tent, Natalie was awakened to a strange sound. It sounded as if something was moving right outside her tent. Natalie nudged her father awake and whispered to him that she heard something moving outside tent. At first, her dad tried to convince Natalie that it was just the wind. Then, he heard it too. All of the sudden, they heard the cans and food next to their fire pit being broken into. Natalie's dad picked up a huge stick and peeked out of the tent. There was a family of raccoons raiding their food. Her dad was relieved they were not bears. However, raccoons can have dangerous diseases. Her dad used the big stick and his flash light to scare off the raccoons. Unfortunately, all of their food was ransacked by the raccoons with the exception of the canned goods. The next day, Natalie and her family rode into town to get some more food for the rest of the camping trip and a sturdier food cooler.

Directions: Use the information in the paragraph above to sequence the events using numerals 1-7.

	There was a family of raccoons raiding their food.
	Then, he heard it too.
	All of the sudden, they heard the cans and food next to their fire pit being broken into.
	At first, her dad tried to convince Natalie that it was just the wind.
	When everyone was asleep in the tent, Natalie was awakened to a strange sound.
	Her dad used the big stick and his flash light to scare off the raccoons.
	Natalie nudged her father awake and whispered to him that she heard something moving outside tent.
