Twins

Twins are some of most the unique set of siblings. Many of them have very similar features. They may also be identical, having the exact same face. Though they share the same birthday, they can have different likes and dislikes. They can either be fraternal twins such boys and girls, or be two boys and two girls. When parents dress identical twins the same, it is difficult to tell them apart from one another. We have several sets of twins in our school. We read an article that stated that more twins are being born nowadays than ever before in our country. One time our teachers got a set of twins mixed up during their fire drill. Even though twins can look the same and sound the same, they may still have very different handwriting. Twins are more likely to have their own set of twins than other people are. All of the twins in our family are fraternal male and female twins.
